# National Interagency Coordination Center Incident Management Situation Report <br> Sunday, September 12, 2021 - 0730 MDT National Preparedness Level 5 

National Fire Activity:
Initial attack activity:
New large incidents:
Large fires contained:
Light (62 fires)

Uncont 2
Uncontained large fires: *** 60
NIMOs committed: 2
Type 1 IMTs committed: 10
Type 2 IMTs committed: 16
Nationally, there are 42 fires being managed under a strategy other than full suppression.
***Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.
Link to Understanding the IMSR.
Two hundred twenty-five soldiers from the 23rd Brigade Engineer Battalion and 2-3 Infantry Battalion based out of Joint Base Lewis-McChord are deployed in support of the Dixie Fire.

One MAFFS C-130 airtanker and support personnel each from the $152^{\text {nd }}$ Airlift Wing (Nevada Air National Guard), three MAFFS from the $302^{\text {nd }}$ Airlift Wing (Colorado Air Force Reserve), two MAFFS from the $153^{\text {rd }}$ Airlift Wing (Wyoming Air National Guard) and two from the $146{ }^{\text {th }}$ Airlift Wing (California Air National Guard) have been deployed to McClellan, CA to support wildland fire operations nationally.

One RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 141st Air Refueling Wing (Washington Air National Guard) and one RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 162nd Operations Group (Arizona Air National Guard) have been deployed to Sacramento, CA in support of wildland fire operations. Also supporting these aircraft are eight ground controllers from multiple U.S. Air National Guard squadrons.

One Boeing 737 airtanker from New South Wales, Australia is supporting fire suppression efforts in the western United States.

Two fire suppression crews from Quebec, Canada are supporting fire suppression efforts in Washington State.

## Northern California Area (PL 5)

| New fires: | 3 |
| :--- | :--- |
| New large incidents: | 0 |
| Uncontained large fires: | 9 |
| NIMOs committed: | 2 |
| Type 1 IMTs committed: | 7 |
| Type 2 IMTs committed: | 3 |

Dixie, Butte Unit, Cal Fire. Unified command between NIMO (Team 1), IMT 1 (Cal Fire Team 1), IMT 1 (CA Team 1) and IMT 2 (CA Team 14). Fifteen miles northeast of Paradise, CA. Timber, brush and light slash. Minimal fire behavior with creeping and smoldering. Several communities, numerous structures and infrastructure threatened. Evacuations, area, road and trail closures in effect.

Caldor, Eldorado NF, USFS. Unified command between NIMO (Team 2), IMT 1 (Cal Fire Team 2) and IMT 1 (CA Team 4). Sixteen miles northeast of Plymouth, CA. Timber, light slash and brush. Active fire behavior with isolated torching, creeping and smoldering. Several communities, numerous structures and infrastructure threatened. Evacuations, area, road and trail closures in effect.

Monument, Shasta-Trinity NF, USFS. Transfer of command from IMT 1 (CA Team 5) to IMT 1 (NR Team 2) will occur tomorrow. IMT is also managing the Knob incident. One mile southwest of Del Loma, CA. Timber and brush. Active fire behavior with uphill runs, group torching and short-range spotting. Several communities, numerous structures and infrastructure threatened. Evacuations, area, road and trail closures in effect.

Knob, Six Rivers NF, USFS. Two miles south of Willow Creek, CA. Timber and closed timber litter. Minimal fire behavior with flanking, creeping and smoldering. Communities of Willow Creek and Salyer and numerous residences threatened. Area, road and trail closures in effect.

River Complex (2 fires), Klamath NF, USFS. IMT 1 (CA Team 2). Nine miles southwest of Etna, CA. Timber and brush. Active fire behavior with flanking, single tree torching and short-range spotting. Several communities, numerous structures and infrastructure threatened. Evacuations, area, road and trail closures in effect.

McCash, Six Rivers NF, USFS. IMT 2 (GB Team 7). Fourteen miles northeast of Somes Bar, CA. Timber, closed timber litter and brush. Active fire behavior with uphill runs, backing and short crown runs. Numerous structures threatened. Evacuations, area, road and trail closures in effect.

Antelope, Klamath NF, USFS. IMT 2 (CA Team 10). Twenty miles northeast of McCloud, CA. Timber and brush. Moderate fire behavior with backing, creeping and smoldering. Structures threatened. Area, road and trail closures in effect.

Bridge, Nevada-Yuba-Placer Unit, Cal Fire. Two miles northeast of Auburn, CA. Chaparral, hardwood litter and timber. Minimal fire behavior with smoldering. Area, road and trail closures in effect.

## Northwest Area (PL 5)

| New fires: | 3 |
| :--- | :---: |
| New large incidents: | 0 |
| Uncontained large fires: | 20 |
| Type 1 IMTs committed: | 3 |
| Type 2 IMTs committed: | 6 |

Cougar Peak, Fremont-Winema NF, USFS. IMT 2 (NW Team 8). Fifteen miles northwest of Lakeview, OR. Timber, brush and medium slash. Minimal fire behavior with creeping, isolated torching and smoldering. Numerous structures threatened. Evacuations, area, road and trail closures in effect.

Devil's Knob Complex (2 fires), Umpqua NF, USFS. IMT 1 (RM Team 1). Twenty miles northeast of Azalea, OR. Timber and medium slash. Moderate fire behavior with backing, flanking and single tree torching. Community of Ash Valley and structures threatened. Evacuations, area, road and trail closures in effect.

Rough Patch Complex (4 fires), Umpqua NF, USFS. IMT 1 (GB Team 2). IMT is also managing the Jack incident. Eighteen miles southwest of Oakridge, OR. Closed timber litter and timber. Moderate fire behavior with flanking, backing and creeping. Structures threatened. Area, road and trail closures in effect.

Jack, Umpqua NF, USFS. Thirty-one miles east of Roseburg, OR. Closed timber litter and timber. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect.

Middle Fork Complex (2 fires), Willamette NF, USFS. IMT 2 (NW Team 6). Nine miles northeast of Oakridge, OR. Timber and light slash. Active fire behavior with backing, creeping and smoldering. Structures threatened. Area, road and trail closures in effect.

Schneider Springs, Okanogan-Wenatchee NF, USFS. IMT 2 (NW Team 10). Eighteen miles northwest of Naches, WA. Short grass, timber and brush. Moderate fire behavior with flanking, backing and creeping. Several communities and numerous structures threatened. Evacuations, area, road and trail closures in effect.

Twenty-five Mile, Okanogan-Wenatchee NF, USFS. IMT 1 (PNW Team 3). IMT 2 (SW Team 3) mobilizing. Twelve miles northwest of Chelan, WA. Short grass, brush and timber. Minimal fire behavior with creeping and smoldering. Numerous structures and communication infrastructure threatened. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Summit Trail, Colville Agency, BIA. IMT 2 (SW Team 4). Seventeen miles west of Inchelium, WA. Timber and closed timber litter. Minimal fire behavior with smoldering.

Bull Complex, Mt. Hood NF, USFS. IMT 2 (NR Team 4). Twenty-five miles northeast of Mill City, OR. Timber and closed timber litter. Moderate fire behavior with backing, creeping and isolated torching. Area, road and trail closures in effect.

Big Meadow, Burns District, BLM. Twenty-eight miles west of Burns, OR. Timber and brush. Moderate fire behavior with isolated torching, short-range spotting and backing. Residences threatened. Road closures in effect. Reduction in acreage due to more accurate mapping.

Walker Creek, Northeast Region, DNR. Four miles northwest of Wauconda, WA. Timber and closed timber litter. Minimal fire behavior with backing, creeping and smoldering. Numerous residences and infrastructure threatened. Area, road and trail closures in effect.

Green Ridge, Umatilla NF, USFS. Thirty miles east of Walla Walla, WA. Short grass, timber and medium slash. Moderate fire behavior with smoldering, creeping and backing. Numerous structures threatened. Area, road and trail closures in effect.

Muckamuck, Colville NF, USFS. Four miles northwest of Conconully, WA. Brush, closed timber litter and timber. Minimal fire behavior with backing, creeping and smoldering. Residences threatened. Area, road and trail closures in effect.

Cedar Creek, Okanogan-Wenatchee NF, USFS. Fifteen miles northwest of Winthrop, WA. Brush, closed timber litter and timber. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect.

Cub Creek 2, Southeast Region, DNR. Five miles north of Winthrop, WA. Brush, closed timber litter and timber. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect.

3Jakes Gulch, Sawtooth NF, USFS. IMT 2 (EA Silver Team). Two miles west of Vienna, ID. Timber and brush. Moderate fire behavior with single tree torching, uphill runs and smoldering. Structures threatened. Area, road and trail closures in effect.

Boundary, Salmon-Challis NF, USFS. Twenty-four miles northwest of Stanley, ID. IMT 2 (GB Team 5). Timber, short grass and brush. Moderate fire behavior with single tree torching and backing. Structures threatened. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

* Legacy, Northwest Area, Utah DOF. Three miles west of Farmington, UT. Tall and short grass. Minimal fire behavior.

Oak Grove, Dixie NF, USFS. Twenty miles northeast of St. George, UT. Timber, brush and slash. Minimal fire behavior with smoldering. Area, road and trail closures in effect.

***Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.
***Additional wildfire information is available through the Geographic Areas at https://gacc.nifc.gov/
Predictive Services Discussion: A mid-level shortwave trough will move through northern portions of the West. Another trough will move over Quebec and portions of the Northeast. A Pacific cold front will move through the Northwest into the Northern Rockies, while another front stalls across the central Plains and Great Lakes. An upper high will remain over the Southeast and extend westward over the Southwest. Dry and breezy conditions are likely in portions of the of the Great Basin, Wyoming, Colorado, central and southern Plains, and the mountain passes and deserts of southern California. Very hot and dry conditions will continue across much of the Southwest, southern California, Colorado, and southern Plains with drier conditions returning to northern California and the northern Great Basin. Isolated to scattered mixed wet and dry thunderstorms are possible over the Colorado Rockies, higher terrain of Wyoming, and onto the adjacent High Plains. Isolated thunderstorms may redevelop overnight across northern Utah into southern Wyoming and northwest Colorado.
http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm

This Day in History is a brief summary of a powerful learning opportunity and is not intended to second guess or be judgmental of decisions and actions. Put yourself in the following situation as if you do not know the outcome. What are the conditions? What are you thinking? What are YOU doing?

## Tuolumne Fire (California) - September 12, 2004

Incident Summary: The Tuolumne Fire was reported by a Stanislaus National Forest lookout at 1233 hours. Dispatch initiated a standard response, including the dispatch of a helicopter with helitack crew. At 1259, Air Attack (ATGS) arrived over the fire and reported it to be between 5 and 10 acres, spreading upslope and upcanyon with a steady 3 to 5 mph wind. The fire was burning near the bottom of the Tuolumne River Canyon, just upstream of a major river confluence, at 1,450 feet elevation in light, flashy fuels (predominantly oak leaf litter, light grass, and mixed brush with an oak overstory, consistent with Fuel Model 2). Fine Dead Fuel Moisture (FDFM) was $4-5 \%$ and live fuel moistures were at critical stage. Temperature was $89-94{ }^{\circ} \mathrm{F}$, relative humidity (RH) $18-24 \%$, and there was no frontal or thunderstorm activity. The canyon is very steep, observed to be $80-120 \%$ slope. At approximately 1335 , the helitack crew began constructing downhill fireline. Ten minutes later they took emergency action when a sudden wind shift caused the fire to flare-up and overrun their position. Of the seven-person crew, three firefighters suffered minor injuries and one firefighter was killed.

1305 - The helicopter arrived over the fire and dropped the crew on a gravel bar $3 / 4$ of a mile downstream of the fire. They hiked from the landing zone (LZ) upcanyon to a dirt road that paralleled the river and walked the road toward the right flank of the fire. The fire was burning both above and below the road. Their helicopter was directed to begin dropping water on the right flank above the road.

A local Division Chief was dispatched to the fire to be the Incident Commander (IC). He drove past the helitack crew to the right flank and observed a slow backing fire, then returned to the location of the helitack crew, which was still hiking. Talking with the helitack captain, he did not identify himself as IC, announce a strategy, or explain specific tactics. He did state that he wanted the crew to find a safe anchor point but the crew understood him to want them to "anchor this fire on the right flank, the road down to the river."

1335 - The crew arrived at the right flank on the road and looked for access to the river and safe access to the bottom of the fire. The ATGS and IC decide to continue to use the helicopter on the right flank above the road. The helitack captain heard this exchange on the radio.ATGS received a radio call about a spot fire and missed discussion about the helitack crew working below the road. (In a post-incident interview, the ATGS stated that he thought the crew was above the road.)

After scouting down the right flank about 70 feet, it was decided to construct indirect fireline downhill for 250 to 300 feet to the river, burning out from the road as they went. Safety zones were identified as down to the river, up to the road, or into the black. All crew members agreed with the plan and informed their helicopter pilot.

An engine was assigned to support the helitack crew. The crew was not notified that the engine was assigned to support them and that it was close by.
1340 - Firefighters located about 30 feet down the line from the road remark that the burn out is pulling in nicely. There was a "flutter" in the wind and the three firefighters closest to the road were told to grab backpack pumps just in case.

1345 - A sudden wind shift caused the fire to flare-up, change direction, and overrun the crew. Thirty seconds later, one crew member was dead. No fire shelters were deployed.

## Discussion Points:

- During size-up, what fire behavior did the personnel observe? If you were at a fire in a similar setting, what local terrain features and other factors might lead you to distrust the observed fire behavior?
- It is common for people to have communication problems. On an incident where these issues can easily compromise anyone's safety, what are you going to do to minimize communication errors as a crew member? Crew boss? Pilot? IC?
- Your crew has been dispatched to this fire. How will you handle the Lookout aspect of LCES? It is common to hear that "everyone on the crew is a lookout." Discuss what each person must do to make this an effective alternative to the traditional lookout.
- This fire had Air Attack and a helicopter assigned. Discuss if and how aerial resources can be used as additional lookouts and sources of information. What are some downfalls to using them in this role?
